

ENGLISH TRANSLATION OF THE LETTER d.d. 15 januari 2010

With this letter I would like to draw your attention to the recent update of our website. www.architectenregister.nl. The new website provides more information and new facilities.

As a registered architect you can login in a secured environment on the website. Within this area you can change your address, ask for a certificate of registration or send a request to remove your name from the register.

You can login on the website by filling in your username and password. Your username is your registration number, your password is mentioned in the letter we have send you earlier.

Once you've logged in for the first time we recommend to change your password. You'll be requested to check your data and if necessary update the information as listed in the register. You also will be requested to indicate in what way you want to be mentioned in the online register on the website.

Others (third parties) may use the online register to check if anyone is entered in the architects register and under what title. This online register also shows if the registered architect is professionally active or not. The online register is provided with a daily up date and therefore contains the current state of affairs.

On the CPD page you can find an overview of the current range of CPD activities (currently only for architects). We recommend that you visit the site regularly to see if suitable activities are offered.

For further information of the website please e-mail to info@architectenregister.nl or contact the SBA and ask for Ingeborg Holtman 003170-3467020.

On behalf of the Board of the Stichting bureau architectenregister

Mr. P.J. Biesheuvel
Chairman
